SKILLS

- Cloud Platforms - AWS, Azure
- DevOps Tools - Jenkins, GitHub Actions, Docker, Kubernetes
- Infrastructure as Code - Terraform, AWS CloudFormation
- Monitoring - Prometheus, Grafana, AWS CloudWatch, New Relic
- AWS Services - EC2, VPC, Auto Scaling, Lambda, IAM, Route53, ECS/EKS, S3, Security Groups, Systems Manager, Config, CloudFormation
- Version Control - Git, GitHub
- OS - Linux
- Networking - VPC, Route Tables, NAT Gateway, Subnets, Security Groups, NACL
- ITSM - ServiceNow

EDUCATION

BCA, (Bachelor of Computer Applications), Achariya Arts and Science College, Villianur, Pondicherry, India
Aug 2016 – May 2019

CERTIFICATIONS AND LICENSES

AWS Certified Cloud Practitioner
Amazon Web Services Training and Certification
Oct 2022 – Sep 2025

AWS Cloud Quest: Cloud Practitioner

SUMMARY

DevOps Engineer with **4+ years of relevant** experience in architecting and managing cloud-native infrastructure across AWS and GCP environments. Proven track record of reducing system downtime by spearheading SRE initiatives, resolving 200+ incident tickets monthly, and enabling zero-downtime deployments through automated CI/CD pipelines. Skilled in Kubernetes orchestration, Prometheus/Grafana monitoring, and infrastructure automation — driving platform reliability, scalability, and cost optimization for enterprise applications serving 150+ users.

EXPERIENCE

Executive, Lumina Datamatics Limited, Pondicherry, India

Sep 2020 – Mar 2022

- Working on (Home category - Walmart) Assigning and re-arranging the product to its relevant Shelves. Documenting & Reporting Product sales and performance report on monthly basis. Working on product attributes, product categories and data aggregation to Increase Product Content Quality.
- Tracking Team status on a daily basis and coordinating with manager & Head of the operation. Quality Check (QC) on the production file for various tasks and ensuring the file is curated before the delivery.

Specialist - Junior DevOps Engineer, HCLTech, Chennai, India

Jul 2022 – Current

- Spearheaded DevOps and SRE initiatives for cloud-native applications across AWS and GCP environments, managing infrastructure for 150+ users and resolving 200+ incident tickets monthly via ServiceNow, resulting in reduced system downtime and improved platform reliability.
- Designed and maintained CI/CD pipelines enabling zero-downtime deployments across development, staging, and production environments, automating release workflows to accelerate delivery frequency and minimize deployment failures.
- Managed Kubernetes workloads with focus on scalability, availability, and cost optimization, implementing auto-scaling policies and monitoring via Prometheus and Grafana to support growing application demands while controlling infrastructure costs.
